Security Policy

Security Policy

Context

Galp, as an integrated energy operator, developing activities in different geographies, subject to different geopolitical conditions and socio-economic contexts, takes on the responsibility of protecting its employees and its assets in terms of Security, ensuring the adoption of appropriate measures to achieve that goal.

Company's position

Galp is committed to:

- Develop security measures in compliance with the laws and regulations applicable in each country where it operates.
- Adopt best practices and appropriate initiatives, with respect for human rights, on matters of security.
- Contribute to the creation of a security awareness, in which each employee is responsible for his/her own protection, ensuring that (s)he acts complying with the criteria set by the company.
- Promote education and training for all employees and contractors on matters of security.
- Ensure the establishment of appropriate channels for internal and external information that allow the adoption of timely measures to prevent security risks.
- Investigate all security incidents systematically and integrate lessons learned.
- Promote effective risk management of security, by conducting assessments that allow the identification of appropriate countermeasures to minimize them.
- Ensure a dialogue with the communities and governments and other entities on matters of security, acting in a responsible and ethical manner.

Final statement

Galp is committed to protecting its employees and assets, acting responsibly in the different contexts in which it develops its activities.
