Health, Safety and Environmental Policy

Health, Safety and Environmental Policy

Context

Galp believes that protecting people, the environment and assets is essential to generating sustainable value, assuming its responsibility in managing the risks and impacts of its activities.

Company's Position

Galp is committed to:

- Integrate Safety, Health and the Environment in the company's strategy and activity and engaging all employees and service providers with it.
- Comply, in all its activities and geographies, with the applicable legislation and regulations on Safety, Health and Environment.
- Establish challenging targets and goals on matters of Safety, Health and Environment by measuring and evaluating the results achieved and taking the necessary actions to carry them out.
- Promote training and qualification of all employees and service providers, valuing operational discipline.
- Use energy and resources in an eco-efficient manner and implement technologies and procedures to ensure the operation of the facilities and equipment in safe conditions, throughout their lifecycle.
- Identify hazards in all its activities and evaluate and manage risks and impacts.
- Manage all changes in human resources, technology and facilities.
- Encourage the development of audits and inspections, in order to assess compliance with the requirements, assuming the results as a management tool for continuous improvement.
- Investigate all incidents systematically, disseminating and integrating lessons learned.
- Create conditions for the organization to remain continuously prepared to respond to emergencies in an effective manner.
- Inform and disseminate this Policy to stakeholders, and communicate – in a responsible and transparent way - the performance in terms of Safety, Health and the Environment.

Final Statement

At Galp, we are committed to the continuous improvement of the performance on Safety, Health and the Environment, by reducing negative impacts while maximizing the positive effect of our activities.
