303-1	Interactions with water as a shared resource	Galp is committed to adopting measures that promote the most efficient and sustainable use of water in its various operations. Among the actions promoted for the sustainable management of this resource, we highlight the periodic updating of the mapping of risks associated with the use of water in 100% of Galp's operations and the monitoring of the quality of groundwater in its upstream and downstream operations, namely on blocks operated onshore and at refineries. The goals established in this area are in line with the eco-efficiency objectives established for the Group's operations. More information about the organization's interaction with water at: <a href="https://www.galp.com/corp/pt/sustentabilidade/os-nossos-">https://www.galp.com/corp/pt/sustentabilidade/os-nossos-</a>	✓	-	-

		compromissos/protecao-das-pessoas-ambiente-ativos/ambiente/biodiversidade-e- Water																																			
303-2	Management of water discharge-related impacts	<p>Galp is concerned with reducing the production of effluents and minimizing its polluting load in all its operations. To ensure an adequate management of the effluents produced, we offer treatment systems, fit for purpose, depending on the type of installation in question (e.g.: dedicated WWTP; pre-treatment systems combined with the sending of pre-treated effluents to a third-party WWTP. part). The level of compliance is ensured through periodic monitoring of the quality of effluents, ensuring that they are below the defined emission limit values. In particular, in 2020, the good performance of both refineries in relation to the concentration of rejected hydrocarbons in the industrial effluent stands out, exceeding the goals established for this indicator. Galp has been developing projects in order to optimize the quality of its wastewater and, consequently, to achieve greater efficiency in its systems, allowing for an increase in the amount of water reused/ recycled. <a href="https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-e-ativos/ambiente/ecoeficiencia-operacional">https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-e-ativos/ambiente/ecoeficiencia-operacional</a></p>	✓

G4-OG8	Lead, benzene and sulphur content in fuels.	<ul style="list-style-type: none"> <li>IR 2020<sup>1</sup>: 3.4 Refining &amp; Midstream</li> </ul> <p>In all fuels, the applicable national limits for benzene and sulphur are met, and Galp refineries do not use lead addition in fuels. The reduction of the sulphur content in fuels implies the purchase of crude oils with a lower sulphur content and/or the use of units that reduce the sulphur content in fuels. Galp successfully adapted its refining system in 2019 and started in November supplying the market with a new marine fuel oil (VLSFO), with a maximum sulphur content of 0.5%, in compliance with the new IMO regulation. Galp therefore anticipated, by its own initiative, the reduction in the sulphur content of marine diesel fuel which came into effect on January 2020. Galp provides its customers with safety data sheets of its products, where the main physical-chemical characteristics are mentioned, as well as safety and environmental aspects, such as hazard identification; first aid; fire-fighting measures; measures to be taken in case of accidental leakage; handling and storage; exposure control / personal protection; toxicological information, Ecological information; transport information; exposure scenarios. Galp informs its customers of the estimated CO<sub>2</sub> emissions associated with fuel consumption through detailed billing. In terms of fuels sold at service stations, information is displayed at the filling stations. Galp website has information on commercialized fuels, emissions, consumption and vehicle protection, when applicable.</p>	✓	-	-

Material aspect: Occupational Health and Safety (403) <sup>2</sup>					
103-1	Explanation of the material theme	• IR 2020 <sup>1</sup> : 1.2 Value creation model; 1.3 Approach to materiality 5.4 People at the centre . Galp's material themes were identified based on the work described in Disclosure 102-47. The "Occupational Health and Safety" theme is connected to the theme "Safety" and, deemed material theme (see materiality matrix). Impacts may occur both in operations and in the value chain.	✓	-	-
103-2	Form of management and its components	• IR 2020 <sup>1</sup> : 5.4 People at the centre .  The best security practices are a priority to our Organisation. On a day-to-day basis, we seek to protect our employees and all those who work with us, the community and the environment. We act according to the best security practices, protecting our employees and all those who work with us, the community and the environment. Safety is a priority in all our projects and therefore we seek to keep in mind in our daily lives and reflected in the behaviours, attitudes and decisions of all those who are part of our Organisation.  We set Safety performance goals throughout the different levels of the organisation, to boost their integration as a priority in the day-to-day activities and as a condition for the Company's sustainability objectives.  The visible commitment of each and every one of those who are part of the Organisation is crucial (HSE operational management system, Management Commitment - Element 01) The commitment of management and responsibilities throughout the organisation's hierarchical structure are explicitly expressed in our HSE Policy and in our HSE operational management System, safeguarding the integration of safety and health with strategy and decisions applied on a daily basis at our Company. The risk assessment activities are ensured at all of our operations to identify and manage the main safety risks. We raise our employees' awareness to the importance of these activities. Our operations have security management systems and are periodically subject to third party independent audits.  We promote an integrated health management that follows the best international practices and regulations, based on four principles: precaution; prevention; protection; continuous improvement.  We understand health protection in a comprehensive perspective, taking into account all aspects of the physical, mental health and well-being of our employees and their families. We focus primarily on two key dimensions: health and medical surveillance; provision of health care in the event of an accident or illness.  Through its HSE Policy, Galp undertakes to integrate HSE into the company's strategy and activity, and to establish challenging goals and objectives on HSE matters, measuring and evaluating the results obtained, and taking the necessary actions for its pursuit, committing all employees and service providers.	✓	-	-

103-3	Evaluation of the form of management	<p>• IR 2020<sup>1</sup>: 5.4 People at the centre .</p> <p>This information is described in the Environment Serie, Material aspect: Materials (301), 103-3</p>	✓	-	-
403-1	Occupational health and safety management system	Galp has an integrated management system (IMS) that encompasses aspects of safety, environment, quality, energy, social responsibility and business continuity. In any of the 6 aspects, we implement the respective processes and standards that ensure compliance with the respective requirements including legal requirements. With regard to occupational health and safety, the ISO 45001 standard (under which we are certified) has a broader concept of worker than the legislation, including employees, service providers and subcontracting.	✓	-	3; 8
403-2	Hazard identification, risk assessment, and incident investigation	<p>As part of the transition from the certification of OSHAS 18001 to ISO 45001, in 2020 the processes of hazard identification and risk assessment and consultation and participation of workers were reviewed. In both cases, a uniform approach was adopted for the entire company, thus ensuring compliance with the requirements of the respective standard.</p> <p>In addition to the above processes, which includes the participation and consultation of workers in the identification of hazards or dangerous work situations, Galp has also made available a reporting platform for near misses and safety improvement suggestion forums in which any worker can report/participate.</p> <p>In addition to Galp's safety policy and processes that allow any worker to remove themselves from unsafe work situations, with the adoption of Galp Life Saving Rules and the distribution of STOP CARDS, in 2019, for the entire company and all workers Galp reinforced its safety culture, where any worker has the authority to intervene at any time if an action or situation violates any of the Galp Life Saving Rules. In the year 2020, with the intention of sensitizing the workers newly arrived at the company, we developed an e-learning ("Safety reception package"), which trains our workers in the main safety issues, including the identification of hazards, the reporting of QAs and the main safety standards.</p> <p>The ISO 45001 Certification ensures that we have implemented an incident investigation process (near-accidents and accidents) that encompasses all phases since an incident occurs. Reacting and responding to any emergency, investigating with the participation of relevant workers the causes, dangers and risks associated with the event and implementing the respective corrective actions according to the hierarchy of controls, thus improving our management system.</p>	✓	-	3; 8
403-3	Occupational health services	Galp ensures the provision of healthcare to its employees, both in the event of an accident at work, as well as in the case of illness or personal accident. Galp's medical centres, distributed across the different geographical areas of its operations (in Portugal), guarantee access to primary medical care (general and family medicine and internal medicine) and to some specialties (such as dentistry, ophthalmology, clinical analysis). Performance in this regard is constantly monitored. More information at: <a href="https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-ativos/saude">https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-ativos/saude</a>	✓	-	3; 8
403-4	Worker participation, consultation, and communication on occupational health and safety	<p>As part of the transition from the certification of OSHAS 18001 to ISO 45001, in 2020 the process of consultation and participation of workers was revised. A uniform approach was adopted for the entire company, thus ensuring compliance with the requirements of the respective standard.</p> <p>In addition to the aforementioned process, we also provide a reporting platform for near misses and safety improvement suggestions forums in which any worker can report / participate.</p> <p>In addition to the Galp Life Saving Rules e-learning and the security hosting package (mentioned in the questions above). We have developed a safety page ("Safe Energy") where we share Alerts, Almost accidents, information on human factors and process safety, safety and safety videos "off-the-job".</p>	✓	-	3; 8
403-5	Worker training on occupational	In 2020, a total of 37,898 hours of training on safety and health topics were held for 3,480 people from all Galp geographies. The transition training from OSHAS 18001 to 45001 and training in the new process safety framework for the entire company stand out as important topics. Also in the year	✓	-	3; 8

	health and safety	2020, with the intention of sensitizing the newcomers to the company, we developed an e-learning ("Safety reception package"), which trains Galp employees in the main safety issues, including the identification of hazards , the reporting of QAs and the main safety standards.																															
403-6	Promotion of worker health	Galp promotes the health and well-being of its employees and family members, namely by promoting the adoption of healthy behaviours and active lives (e.g. nutrition consultations and prevention of obesity and cardiovascular diseases), conducting awareness and prevention campaigns diseases and epidemics (ex: zika virus, ebola, dengue) and implementation of personal development programs from the perspective of well-being. In addition, Galp promotes thematic conferences on topics related to health. More information about initiatives in this field at: <a href="https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-ativos/saude">https://www.galp.com/corp/pt/sustentabilidade/os-nossos-compromissos/protecao-das-pessoas-ambiente-ativos/saude</a>		✓	-	3; 8																											
403-7	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	At the end of each, the areas are consulted in order to plan which audits to be carried out on suppliers in the following year. At the end of 2019, 44 audits of suppliers were planned for 2020, with 38 being carried out. These audits can be carried out at the headquarters of the respective companies or at the shipyards and activities they perform at our facilities. The scope of the audits includes the Security component, where the requirements of ISO 45001 are verified.		✓	-	3; 8

<b>Main types of work-related injuries (Employees and contractors)</b>	
Of the 28 accidents that occurred (13 of employees and 15 of service providers), 9 consisted of falls to the same level of low severity, mainly resulting in sprains. The serious accident that occurred in 2020 was due to a situation at the beginning of the year where a collaborator was hit by a forklift. The second most frequent type of accident in the year 2020 was shocks against objects.	
<b>Hazards that pose a risk of high-consequence injury (Employees and contractors)</b>	
In all accidents, the NT-P-019 standard was applied, which requires a detailed investigation with the identification of immediate causes and roots. After identifying the causes, the research team proposes the respective corrective actions. The top 3 of the most identified root causes were: work planning, behaviour and procedures and methods.	
<b>Other information (Employees and contractors)</b>	
In all accidents, according to the accident verification checklist, the definition of root causes and subsequently the definition of corrective actions that prevent the identified causes are required. Each accident has an independent investigation and the actions developed / proposed are defined taking into account the hierarchy of controls and the location / OU where the accident happened.

## ***Independent Assurance Report***

**(Free translation from the original in Portuguese)**

To the Board of Directors

### ***Introduction***

We were engaged by the Board of Directors of Galp Energia, SGPS, S.A. ("Galp" or "Company") to perform a reasonable assurance engagement on the indicator identified below in the section "Responsibilities of the auditor" and a limited assurance engagement on the non-financial sustainability information also identified in that section, which integrate the sustainability information included in the Report "Galp - Non-financial information 2020", for the year ended in December 31, 2020, prepared by the Company for the purpose of communicating its annual sustainability performance and demonstrating its alignment with the recommendations of the Task Force on Climate Financial Disclosures, the United Nations Global Compact principles (Communication on Progress) and the United Nations Sustainable Development Goals.

### ***Responsibilities of the Board of Directors***

It is the responsibility of the Board of Directors to prepare the sustainability information identified below in the section "Responsibilities of the auditor", included in the Report "Galp - Non-financial information 2020", in accordance with the sustainability reporting guidelines "Global Reporting Initiative" version GRI Standards and with the instructions and criteria disclosed in the Report "Galp - Non-financial information 2020", and the maintenance of an appropriate system of internal control to enable the adequately preparation of the mentioned information.

### ***Responsibilities of the auditor***

Our responsibility is to issue an assurance report, which is professional and independent, based on the procedures performed and specified in the paragraph below.

Our work was conducted in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised) "Assurance engagements other than audits or reviews of historical financial information", issued by the International Auditing and Assurance Standards Board of the International Federation of Accountants and we have fulfilled other technical standards and recommendations issued by the Institute of Statutory Auditors. These standards require that we plan and perform our work to obtain:

- a) reasonable assurance on whether Galp's Carbon Footprint 2020 (scopes 1 and 2); and
  - b) limited assurance on whether the remaining sustainability information 2020 (GRI indicators),
- is free from material misstatement.

Our limited assurance engagement also consisted in carrying out procedures with the objective of obtaining a limited level of assurance as to whether the Company applied, in the sustainability

---

*Matriculada na CRC sob o NUPC 506 628 752, Capital Social Euros 314.000*

*Inscrita na lista das Sociedades de Revisores Oficiais de Contas sob o nº 183 e na CMVM sob o nº 20161485*

information included in the Report "Galp - Non-financial information 2020", the GRI Standards guidelines.

For this purpose the above mentioned work included:

- (i) Inquiries to management and senior officials responsible for areas under analysis, with the purpose of understanding how the information system is structured and their awareness of issues included in the report;
- (ii) Identification of the existence of internal management procedures leading to the implementation of economic, environmental and social policies;
- (iii) Testing, on a sampling basis, the efficiency of processes and systems in place for collection, consolidation, validation and reporting of the performance information previously mentioned, through calculations and validation of reported data;
- (iv) Confirmation that operational units follow the instructions on collection, consolidation, validation and reporting of performance information;
- (v) Execution of substantive procedures, on a sampling basis, in order to collect evidence of the reported information;
- (vi) Comparison of financial and economic data included in the sustainability information with the data audited by the external financial auditor, in the scope of the audit of Galp's financial statements for the year ended in December 31, 2020;
- (vii) Analysis of the process for defining the materiality of the sustainability issues, based on the materiality principle of GRI Standards, according to methodology described by the Company in the Report;
- (viii) Verification that the sustainability information included in the Report complies with the requirements of GRI Standards.

In addition, for the purpose of reasonable assurance work, we performed analytical and substantive tests, and based on defined materiality criteria we have verified the adequate application of reporting criteria defined by Company in the Carbon Footprint 2020 calculation, disclosed in the Report "Galp - Non-financial information 2020".

In the limited assurance work, the procedures performed were more limited than those used in an engagement to obtain reasonable assurance and, therefore, less assurance was obtained than in a reasonable assurance engagement.

We believe that the procedures performed provide an acceptable basis for our conclusion.

### ***Quality control and independence***

We apply the International Standard on Quality Control 1 (ISQC1) and, accordingly, maintain a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) and of the ethics code of the Institute of Statutory Auditors.

***Conclusion on the reasonable assurance work***

Based on the work performed, it is our opinion that the Galp's Carbon Footprint 2020 (scopes 1 and 2), identified above in the section "Responsibilities of the auditor", included in the Report "Galp - Non-financial information 2020", for the year ended in December 31, 2020, was prepared, in all material respects, in accordance with GRI Standards requirements and with the instructions and criteria disclosed on it.

***Conclusion on the limited assurance work***

Based on the work performed, nothing has come to our attention that causes us to believe that the remaining sustainability information, identified above in the section "Responsibilities of the auditor", included in the Report "Galp - Non-financial information 2020", for the year ended in December 31, 2020, was not prepared, in all material respects, in accordance with GRI Standards requirements and with the instructions and criteria disclosed on it, and that Galp has not applied, in the sustainability information included in the Report "Galp - Non-financial information 2020", the GRI Standards, for the option "In accordance – Comprehensive".

***Restriction on use***

This report is issued solely for information and use of the Board of Directors of the Company for the purpose of communicating the annual sustainability performance in the Report "Galp - Non-financial information 2020" and should not be used for any other purpose. We will not assume any responsibility to third parties other than Galp by our work and the conclusions expressed in this report, which will be attached to the Company's "Galp - Non-financial information 2020" Report.
