## 1. Second quarter and first half of 2019 highlights

### Second quarter 2019

- CFFO was €613 m and FCF was €342 m, or €7 m after dividend payments.
- Consolidated RCA Ebitda of €615 m, considering IFRS 16:
  - E&P: RCA Ebitda was €408 m, down 1% YoY, reflecting a lower oil price environment, which offset the higher production and the stronger U.S. Dollar against the Euro.

Working interest production increased 3% YoY to 111.7 kboepd, supported by the contribution of block 32, in Angola, where the Kaombo South FPSO started operations in April. In Brazil, despite the ramp-up of FPSO #8 and #9, production to Galp was impacted by Lula's unitisation (stake diluted from 10% to c.9.2%, effective as of April 1<sup>st</sup>) and by maintenance activities.

- R&M: RCA Ebitda was €142 m, a 19% decrease YoY, due to weaker refining margins and lower raw materials processed.
  - G&P: RCA Ebitda increased €23 m YoY to €57 m, benefiting from sourcing opportunities and a stronger performance from the natural gas and electricity commercial activity.
- RCA Ebit was down YoY to €386 m, considering a negative impact from depreciation charges given the increased number of production areas in the upstream.
- RCA net income was €200 m. IFRS net income was €231 m, with non-recurring items of €14 m and an inventory effect of €17 m.
- Capex totalled €236 m in the quarter, of which 75% allocated to the E&P business, mostly focused on Lula's execution and the LNG project in Mozambique, and including the payment related with the 3% stake acquisition in BM-S-8 block.

### First half 2019

- CFFO amounted to €1.0 bn, benefiting from the increased contribution from the upstream business, although partially offset by a weaker R&M performance.
- RCA Ebitda was €1.1 bn, a 2% increase YoY, considering the positive impact from the application of the IFRS 16 standard. Excluding such effect, RCA Ebitda would have been slightly down reflecting the lower contribution from R&M, pressured by a weaker refining performance during the period.
- Total investment reached €385 m with E&P accounting for 80% of capex and the remaining mainly focused on the improvement of refining energy efficiency.
- FCF reached €501 m, or €98 m already considering dividends paid to non-controlling interests of €107 m and to shareholders of €296 m.

## FY2019 guidance update

- Maintaining WI production growth target of 8 – 12% YoY.
- RCA Ebitda estimated above €2.2 bn (previously €2.1 – 2.2 bn), considering the operating performance during the first half and the expected macro environment.
- Capex expected at c.€0.9 bn (previously c.€1 bn).
- Brent price now considered at c.\$65/bbl (previously c.\$60/bbl) and Galp refining margin assumed at c.\$4/boe (previously \$5 – 6/boe).

**Note:** As of January 1, 2019, Galp adopted the IFRS 16 accounting standard. 2018 figures were not restated according to this accounting standard. For comparison purposes, the report also includes 2019 adjusted figures excluding the IFRS 16 impacts.

## Operations

### Second quarter

Working interest (WI) production increased 3% YoY to 111.7 kboepd, driven by the Kaombo project in Angola, as well as the ongoing ramp-up of the Lula project in Brazil. Natural gas amounted to 11% of Galp's total production.

In Brazil, production was lower YoY, with the ramp-up of FPSO #8 and #9 offset by Galp's stake adjustment from 10% to 9.209% in the Lula and South of Lula unitised area, which became effective as of April 1<sup>st</sup>, 2019, and by the maintenance performed in FPSO #1, #2 and #3 during the period.

In Angola, WI production increased 7.4 kbpd YoY to 14.1 kbpd, supported by block 32 contribution, with Kaombo South FPSO first oil on April 1<sup>st</sup> and the first unit, Kaombo North, continuing to ramp-up.

Net entitlement production increased YoY, to 109.7 kboepd.

### First half

Average WI production during the first half of 2019 was 112.2 kboepd, 6% higher YoY, supported by the start of production of block 32 in Angola and the progress of the Lula field in Brazil, despite the unitisation effect.

Net entitlement production increased 5% YoY, to 110.3 kboepd.

## Results

### Second quarter

RCA Ebitda was €408 m, slightly down YoY, reflecting the lower oil prices environment, which more than offset the higher production in the period, stronger U.S. Dollar against the Euro and the application of IFRS 16 accounting standard.

Production costs were €41 m, excluding costs related with operating leases of €34 m due to the application of IFRS 16. In unit terms, and on a net entitlement basis, production costs were \$4.6/boe. Excluding the impacts from accounting changes, production costs increased YoY to \$8.5/boe, considering the ramp-up of FPSOs #8 and #9.

Amortisation and depreciation charges (including abandonment provisions) increased €46 m YoY to €129 m, reflecting the higher operating asset base, namely in Angola, as well as the €23 m impact from IFRS 16. On a net entitlement basis, DD&A was \$14.5/boe, or \$12.0/boe on a comparable YoY basis.

RCA Ebit was €278 m, down 15% YoY.

### First half

RCA Ebitda was €782 m, up 11% YoY, on the back of the higher production in the period and stronger USD:EUR exchange rate, reflecting as well the application of IFRS 16. Still, operating results were partially offset by weaker oil prices.

Production costs were €75 m, excluding costs related with operating leases of €67 m. In unit terms, and on a net entitlement basis, production costs were \$4.2/boe or \$8.0/boe on a comparable YoY basis.

Amortisation and depreciation charges (including abandonment provisions) amounted to €248 m, an increase of €82 m YoY, impacted by the higher asset base deployed and IFRS 16 effects of €45 m. On a net entitlement basis, DD&A was \$14.0/boe, (or \$11.5/boe on a comparable YoY basis, not considering IFRS 16).

RCA Ebit was €534 m, slightly down YoY.

### Other E&P highlights

ANP approved in June the pending transaction related with BM-S-8 and therefore the Greater Carcará partners' interests are now aligned between the license and the Carcará North area, with Galp holding a 20% stake across the project. Still on the Greater Carcará project, the partners concluded the drilling of Carcará East appraisal well and are now performing a DST.

### Operations

#### Second quarter

Raw materials processed in Galp's refining system were 26.1 mmboe during the quarter, 10% lower YoY. Crude oil accounted for 88% of raw materials processed, of which 86% corresponded to medium and heavy crudes.

Middle distillates (diesel and jet) accounted for 49% of production, gasoline for 23% and fuel oil for 13%. Consumption and losses accounted for 8% of raw materials processed.

Total product sales decreased 4% YoY, with lower refining throughput reducing exports. Volumes sold to direct clients increased 8% YoY to 2.3 mton following the positive demand evolution and considering 2Q18 had been impacted by temporary lower naphtha demand from a large client.

#### First half

Raw materials processed were 48.7 mmboe during the period, 10% lower YoY due to operational restrictions in the refining system. Crude oil accounted for 88% of raw materials processed, of which 85% corresponded to medium and heavy crudes.

Middle distillates (diesel and jet) accounted for 46% of production, gasoline for 24% and fuel oil for 14%. Consumption and losses accounted for 8% of raw materials processed.

Total product sales decreased 7% YoY, driven by fewer exports considering lower refining throughput. Volumes sold to direct clients increased 6% YoY to 4.4 mton following the positive demand evolution in Iberia.

### Results

#### Second quarter

RCA Ebitda for the R&M business was €142 m, considering the application of IFRS 16 (positive €13 m impact in Ebitda). Results reflected a lower YoY contribution from the refining activity, despite the solid performance from the marketing activity.

Galp's refining margin was down YoY to \$3.0/boe, mainly due to weaker middle and light distillates cracks and aromatics margins, together with lower sourcing optimisation opportunities.

Refining costs were €53 m, in line YoY, or \$2.3/boe in unit terms which reflects the lower utilisation. Refining margin hedging operations contributed with €2 m to Ebitda during the quarter.

The marketing activity was supported by higher sales to direct clients.

RCA Ebit was €48 m. IFRS Ebit was €101 m, with a positive inventory effect of €27 m and a non-recurring item of €25 m related to a gain from the sale of a logistics asset.

### First half

RCA Ebitda for the R&M business was €212 m, considering the application of the IFRS 16 (positive €25 m impact in Ebitda). Results were impacted by a lower contribution from the refining activity.

Galp's refining margin was down YoY to \$2.7/boe, reflecting higher operational restrictions in the refining system during the first quarter and a weaker international refining environment.

Refining costs stood in line at €101 m, or \$2.4/boe in unit terms, while margin hedging operations contributed with €6 m during the period.

The oil products marketing activity benefited from robust sales to direct clients.

RCA Ebit was €27 m, while IFRS Ebit was €108 m, with a positive inventory effect of €55 m and a non-recurring item of €25 m.

## Operations

### Second Quarter

Total volumes sold of NG/LNG stood in line YoY at 1,887 mm<sup>3</sup>, with the increase in sales to direct clients offset by lower trading volumes, mostly LNG. Sales to direct clients increased 72 mm<sup>3</sup> YoY to 1,205 mm<sup>3</sup>, following a better performance from the industrial segment in Iberia.

Sales of electricity to direct clients were 788 GWh, down 19% YoY, due to the lower volumes sold to wholesale clients.

Sales of electricity to the grid were slightly down to 328 GWh during the period.

### First Half

Sales of NG/LNG were 3,851 mm<sup>3</sup>, in line YoY. Trading volumes slightly decreased, with stronger network trading volumes nearly offsetting fewer LNG trading opportunities following the end of long-term structured contracts during 2018. Sales to direct clients were also stable at 2,354 mm<sup>3</sup>, with lower sales to the electric segment offsetting a better performance from the industrial clients in Iberia.

Sales of electricity to direct clients were 1,629 GWh, down 21% YoY, on the back of lower volumes to industrial clients.

Electricity sales to the grid were slightly down to 667 GWh.

## Results

### Second Quarter

RCA Ebitda increased €23 m YoY to €57 m, benefiting from market sourcing opportunities and a better performance from the natural gas and electricity commercial activity in Iberia.

Ebitda for the Power generation activity was stable at €11 m.

RCA Ebit was €53 m, while IFRS Ebit was €48 m.

Results from associated companies were €24 m, of which €7 m related to Galp Gás Natural Distribuição, S.A. (GGND).

### First Half

RCA Ebitda increased €37 m YoY to €105 m, supported by a higher contribution from the sales of natural gas and electricity to direct clients, but also benefiting from sourcing optimisation and stronger network trading results.

Ebitda for the Power generation activity was slightly down to €22 m, in line with volumes' contraction.

RCA Ebit was €95 m, while IFRS Ebit was €87 m.

Results from associated companies were €47 m, of which €12 m related to GGND.

### Other G&P highlights

During June, Galp announced the signature of an agreement with Sonatrach to ensure the sourcing of 2.5 billion cubic metres per year of natural gas from Algeria to Iberia, through the existing international pipelines routes. The contract will be in place for up to 10 years.

### Second quarter

RCA Ebitda decreased 2% YoY to €615 m, considering the application of the IFRS 16 standard, which had a positive effect during the quarter of €49 m. Ebitda was impacted by the weaker macro environment YoY, both in terms of commodity prices and international refining margins. IFRS Ebitda was €666 m, considering an inventory effect of €23 m and non-recurring items of €28 m.

RCA Ebit was down YoY to €386 m, considering a €35 m impact in depreciation charges from the application of the IFRS 16 standard and higher DD&A in the upstream segment. IFRS Ebit was €437 m.

During the quarter, financial results were negative by €10 m, considering interest charges related to operating leases from the application of IFRS 16 standard of €23 m. Mark-to-market of derivatives amounted to a €15 m gain.

RCA taxes decreased from €230 m to €190 m, following the lower operating results.

Non-controlling interests of €34 m were mainly attributable to Sinopec's stake in Petrogal Brasil.

RCA net income was €200 m, while IFRS net income was €231 m, with non-recurring items of €14 m and an inventory effect of €17 m.

### First half

RCA Ebitda was €1,109 m, a 2% increase YoY, considering the positive impact from the application of the IFRS 16 standard. Excluding such effect, RCA Ebitda would have been slightly down reflecting the lower contribution from R&M, pressured by a weaker refining performance during the first half of 2019.

RCA Ebit was €663 m, down YoY, impacted by depreciation charges from the application of the IFRS 16. IFRS Ebit was €539 m.

Financial results were negative by €8 m, as the positive mark-to-market of derivatives was offset by the interests expenses related with operational leases under IFRS 16. It is also worth highlighting the YoY decrease in net interests following the reduction in debt and in the average cost of funding.

RCA taxes decreased YoY to €363 m, reflecting the lower operating results, namely in the R&M business.

Non-controlling interests of €72 m were mainly attributable to Sinopec's 30% stake in Petrogal Brasil.

RCA net income was €303 m and IFRS net income reached €223 m in the first half of 2019. Non-recurring items, which amounted to €111 m, include the impact from the unitisation of the Lula field, as well as €30 m related to CESE.

The provision related to CESE results from the strict applicability of accounting standards. However, in Galp's opinion, based on the opinion of renowned legal experts, the laws regarding CESE have no legal grounds and, accordingly, such amounts are not due.

<sup>1</sup>Capex figures based in change in assets during the period.

### Second quarter

Capex totaled €236 m during the quarter, of which 75% allocated to the E&P business.

Investment in development and production activities reached €87 m and it was mostly related with the execution of Lula in block BM-S-11 and the LNG project in Mozambique. Capex of €91 m in exploration and appraisal (E&A) activities was mostly related with the payment for the 3% stake acquisition in BM-S-8.

Investments in downstream activities were mainly directed to the maintenance and improvement of refining energy efficiency, namely the implementation of the \$1/boe initiatives, as well as improvements in logistics infrastructures supporting oil marketing activities.

### First half

During the first half of 2019, total investment reached €385 m. E&P accounted for 80% of capex, with development and production activities accounting for 65% of the total investments in upstream. Besides the stake acquisition in BM-S-8, E&A capex was mainly related with works in the North of Carcará.

Investments in downstream were mainly focused on the improvement of refining energy efficiency.

<sup>3</sup>Includes both interest and capital payments, which in 2Q19 amounted to €22 m and €27 m, respectively.

<sup>4</sup>Dividends paid to Sinopec. In addition Sinopec reimbursed its loan of €176 m to Galp/Sinopec JV in 1Q19, the proceeds of which were used to fund a share premium reduction in Galp/Sinopec JV.

#### Second quarter

CFFO was up YoY to €613 m, despite the weaker macro environment, and already considering the €49 m positive effect from the IFRS 16.

FCF was €342 m, considering a net capex of €223 m. FCF after the payment of dividends to shareholders and to non-controlling interests was positive at €7 m.

#### First half

CFFO amounted to €1.0 bn, benefiting from the increased contribution from the upstream business, although partially offset by a weaker R&M performance.

During the first half of 2019, FCF reached €501 m, or €98 m, already considering dividends paid to non-controlling interests of €107 m and to shareholders of €296 m.

## 6. Basis of reporting

Galp's consolidated financial statements have been prepared in accordance with IFRS. The financial information in the consolidated income statement is reported for the quarters ended on June 30, 2019 and 2018, and March 31, 2019. The information in the consolidated financial position is reported as of June 30 and March 31, 2019 and as of 31 December 2018.

Galp's financial statements are prepared in accordance with IFRS, and the cost of goods sold is valued at weighted-average cost. When goods and commodity prices fluctuate, the use of this valuation method may cause volatility in results through gains or losses in inventories, which do not reflect the Company's operating performance. This is called the inventory effect.

Another factor that may affect the Company's results, without being an indicator of its true performance, is the set of non-recurring material items considering the Group's activities.

For the purpose of evaluating Galp's operating performance, RCA profitability measures exclude non-recurring items and the inventory effect, the latter because the cost of goods sold and materials consumed has been calculated according to the Replacement Cost (RC) valuation method.

With regards to risks and uncertainties, please read chapter 7. Part I – C. III Internal control and risk management of Galp's Integrated Report 2018, as no material changes are expected during the following six months.

### Recent changes

Galp started adopting IFRS 16 as of January 1, 2019. Under this accounting standard, most lease agreements were recognised in the balance sheet as a right-of-use asset and a financial liability. Subsequently, the right-of-use asset is depreciated through the shortest of its economic useful life or the lease agreement tenure. The financial liability considers interest based on the agreement's effective interest rate or the contracting entity's borrowing rate. Lease payments are reflected as a reduction of lease liabilities.

The adoption of IFRS 16 will not impact the Company's cash generation.

## Notes to the condensed consolidated financial statements

### 1. Corporate information

Galp Energia SGPS, S.A. (the Company) has its Head Office in Lisbon, Portugal and its shares are listed on Euronext Lisbon.

### 2. Basis of preparation and changes to the Group's accounting policies

#### 2.1 Basis of preparation

The condensed consolidated financial statements for the six-month period ended 30 June 2019 were prepared under IAS 34 - Interim Financial Reporting. The financial statements do not include all the information and disclosures required in the annual financial statements. In addition, only the material changes required by IFRS 7 and IFRS 13 were disclosed. In this context, these financial statements must be read in conjunction with the consolidated financial statements of the Galp Group for the year ended 31 December 2018.

Based on the results of the Galp Group and its business units, as well as on the macroeconomic conditions in the countries and segments in which each business unit operates, there were no indications, as at 30 June 2019, that would lead us to alter the conclusions reached during the preparation of the annual financial statements as at 31 December 2018 regarding the recoverability of tangible and intangible assets, goodwill and financial investments in associates and joint ventures.

The condensed consolidated financial statements have been prepared in millions of Euros, except where expressly indicated otherwise. Due to rounding, the totals and sub-totals of the presented tables may not be equal to the sum of the figures presented.

#### 2.2 New standards, interpretations and amendments adopted by the Group

##### *IFRS 16 - Leases*

##### a) Nature of the effect of adoption of IFRS 16

The Group has applied IFRS 16 using the modified retrospective approach, and therefore the comparative information has not been restated and continues to be reported in accordance with IAS 17 and IFRIC 4.

##### b) Summary of new accounting policies

##### *Recognition*

The Group recognises both a right-of-use asset and a lease liability as at the lease commencement date. The right-of-use asset is initially measured at cost, which represents the initial amount of the lease liability adjusted for any lease payments made on or before the commencement date, plus any initial direct costs incurred, plus an estimate of the costs required to dismantle and remove the underlying asset or to restore the site on which it is located (if applicable), less any lease incentives received.

The lease liability is initially measured at the present value of the lease payments that have not yet been paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot readily be determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The types of lease payments included in the measurement of the lease liability are as follow:

- Fixed payments, including in-kind fixed payments;

- Variable lease payments that are pegged to an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Group is reasonably certain to be able to exercise, lease payments over an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for the early termination of a lease, unless the Group is reasonably certain not to terminate it early.

The lease liability is remeasured when there are changes in the amounts of future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or it is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets and lease liabilities in a separate line in the statement of financial position.

#### *Short-term leases and leases of low-value assets*

As permitted under the standard, the Group does not recognise right-of-use assets and lease liabilities for short-term leases of assets that have lease terms of 12 months or less, and leases of low-value assets. The Group recognises the lease payments associated with these leases as expenses on a straight-line basis over the lease term.

#### ***Amortisation***

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those used for the property and equipment items.

#### ***Impairment***

The right-of-use assets are periodically reduced by the amounts of impairment losses and adjusted to reflect certain remeasurements of the respective lease liabilities.

#### **Accounting estimates and judgments**

##### ***Useful lives, residual values of intangible assets and discount rates***

The calculation of the assets' residual values, the estimation of the useful lives, and the discount rates used are based on the premises of the lease contracts (or for similar assets) and are set based on Management's judgment, as well as the practices of its peers in the industry.

##### ***Impairment of Right-of-use Assets***

Identifying impairment indicators, estimating future cash flow and determining the fair value of assets requires Management to use significant judgment in terms of the identification and evaluation of the different impairment indicators, the expected cash flow, the applicable discount rates, useful lives and residual amounts.

For quantitative information, please see Note 6.

### 3. Segment reporting

The Group operates across three different business segments based on the types of products sold and services rendered: Exploration & Production, Refining & Marketing and Gas & Power.

The Exploration & Production segment is Galp's presence in the upstream sector of the oil and gas industry, which involves the management of all activities relating to the exploration, development and production of hydrocarbons, mainly focused in Brazil, Mozambique and Angola.

The Refining & Marketing segment owns two refineries in Portugal, and also covers all activities relating to the retail and wholesale marketing of oil products (including LPG). This segment also comprises the storage and transportation infrastructure for oil products in Portugal and Spain, both for export and import, and for the marketing of its products to the main consumer centres. This retail marketing activity using the Galp brand also includes some specific countries in Africa.

The Gas & Power segment encompasses the areas of procurement, supply, distribution and storage of natural gas, electric and thermal power generation.

Besides the three business segments, the Group included within the category "Others" the holding company Galp Energia, SGPS, S.A. and companies with various activities including Tagus Re, S.A. and Galp Energia, S.A., a reinsurance company and a provider of shared services at the corporate level.

The segment reporting is presented on a replacement cost (RC) basis, which is the earnings measure used by the Chief Operating Decision Maker to make decisions regarding the allocation of resources and to assess performance. Under the RC method, the current cost of sales measured under IFRS (the weighted average cost) is replaced by the crude reference price (i.e. Brent-dated) as at the balance sheet date, as though the cost of sales had been measured at the replacement cost of the inventory sold.

The financial information for the previously identified segments, for the six-month period ended 30 June 2019 and 2018 is as follows:

<b>Balance as at 30 June 2019</b>	<b>446</b>	<b>3,132</b>	<b>40</b>	<b>1,706</b>	<b>5,324</b>

During the period under review and in line with its strategy, the Group made the following investments: in the E&P business unit, related to projects in Brazil (€238 m), Angola (€58 m) and Mozambique (€34 m). The R&M segment made investments in the amount of €42 m. The additions to tangible assets for the six-month period ended 30 June 2019 also include the capitalization of financial charges in the amount of €11 m (Note 21).

Galp, through its subsidiary Petrogal Brasil, owned a 10% stake in the BM-S-11 consortium, which holds the Lula accumulation, currently under development.

As the Lula accumulation extends outside the BM-S-11 licence towards the adjacent areas of South of Tupi, a Transfer of Rights area, and to an open area, an unitisation process was required, according to the Brazilian legislation.

ANP (Agência Nacional do Petróleo, Gás Natural e Biocombustíveis) approved in March the unitisation agreement related with the Lula accumulation, which was effective from April 1, 2019. The agreement establishes the tract participation each party now holds in the unitised area, as well as the terms and conditions for the shared development of the project. With the unitisation agreement the participation is 9,209% on the Lula unitised area (Lula and the South of Lula).

Unitisation processes require equalisations among the parties, based on past capital expenditures carried by partners for their original interest and the net profits received there under. These equalisations lead to reimbursements among partners as per the terms and conditions agreed between themselves.

During the first quarter of 2019, Galp recognised in its financial statements the impact from the stake dilution in the Lula accumulation. As at 30 June 2019, the Group's best estimate include a negative €97 m in net income (after non-controlling interests) and €135 m decrease in other assets/payables resulting from the past revenues and net investments (in the amount of €74m considered in currency exchange differences and other adjustments in the table above) from the BM-S-11 consortium and the Transfer of Rights area. Additional amounts related with associated companies are still to be recognised, and should lead to a net equalisation payable position of €90 m in Lula.

Galp is present in four other areas involved in unitisation processes, expected to be concluded soon, and which should lead to a receivable of approximately €200 m. Altogether, the Group's net position related with the unitisation processes is expected to be a receivable of approximately €110 m.

## 5. Intangible assets and Goodwill

	Unit: € m

<b>Impairment of other receivables</b>	9.3	(6)	-	(6)	-

The balance of €105 m recorded under "Other debtors - Non-operated blocks" includes €74 m related to the receivables from partners regarding payments made on their behalf, which will be recovered from such partners during the production period.

The balance of €153 m recorded under "Other debtors - Underlifting" corresponds to the amounts receivable by the Group as a result of the lifting of barrels of crude oil below the production quota, and is valued at the lower of the market price at the date of sale and the market price at 30 June 2019.

The balance of €42 m refers to the right to receive held by Petrogal Brasil SA to Winland International Petroleum (Sinopec) for the capital subscribed but not yet paid in during the period.

Other deferred charges include the amount of €36 m relating to post-employment benefits (Note 15).

## 9.3. Impairment of Trade Receivables and Other Receivables

The movements noted in Impairment of trade receivables and other receivables, for the six-month period ended 30 June 2019, were as follows:

### 14. Taxes and other contributions

#### 14.1. Taxes and SPT (Special Participation Tax)

The Group's operations take place in several regions and are carried out by various legal entities, subject to locally established income tax rates, varying between 25% in Spain and the Netherlands, 31.5% in Portugal and 34% for companies based in Brazil.

Group companies headquartered in Portugal in which the Group has an interest equal to or greater than 75%, if such participation grants voting rights of more than 50%, are taxed in accordance with the special regime for the taxation of groups of companies, with the taxable income being determined at the level of Galp Energia, SGPS, S.A.

Spanish tax resident companies, in which the percentage held by the Group exceeds 75%, have been taxed on a consolidated basis in Spain from 2005 onwards. Currently, the fiscal consolidation in Spain is performed by Galp Energia España S.A.

The Company and its subsidiaries' income tax estimates are recorded based on the taxable income.

Taxes and SPT recognised in the consolidated income statement for the six-month period ended 30 June 2019 and 2018 are as follows:

	June 2019			June 2018		
	Current tax	Deferred tax	Total	Current tax	Deferred tax	Total
	Unit: € m					
<b>Taxes and SPT for the period</b>	<b>297</b>	<b>4</b>	<b>301</b>	<b>319</b>	<b>86</b>	<b>405</b>

## Limited review report on the condensed consolidated financial statements

### Introduction

We have performed a limited review on the condensed consolidated financial statements of Galp Energia, SGPS, S.A. (the Entity), which comprise the condensed consolidated statement of financial position as at 30 June 2019 (showing a total of 13,991 million Euros and a shareholder's equity total of 5,817 million Euros, including a consolidated net profit of 254 million Euros), condensed consolidated income statement and consolidated statement of comprehensive income, of changes in equity and of cash flows for the six month period then ended, and the notes to the condensed consolidated financial statements which includes a summary of significant accounting policies.

### Board of Directors responsibilities

The Board of Directors is responsible for the preparation of the condensed consolidated financial statements in accordance with the International Financial Reporting Standards as endorsed by the European Union for Interim Financial Reporting (IAS 34), and for the design and maintenance of an appropriate system of internal control to enable the preparation of consolidated financial statements which are free from material misstatement due to fraud or error.

### Auditor's Responsibilities

Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review. We conducted our review in accordance with the International Standard on Review Engagements 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, and other rules and technical and ethical requirements issued by the Institute of Statutory Auditors. Those standards require that our work is performed in order to conclude that nothing has come to our attention that causes us to believe that the condensed consolidated financial statements have not been prepared in all material respects in accordance with the International Financial Reporting Standards as endorsed by the European Union for Interim Financial Reporting (IAS 34).

A review of financial statements is a limited assurance engagement. The procedures performed consisted primarily of making inquiries of management and others within the Entity and its subsidiaries, as appropriate, and applying analytical procedures, and evaluating the evidence obtained.

The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing. Accordingly, we do not express an audit opinion on these condensed consolidated financial statements.

### Conclusion

Based on our review procedures, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements of Galp Energia, SGPS, S.A., as at 30 June 2019, have not been prepared, in all material respects, in accordance with the International Financial Reporting Standards as endorsed by the European Union for Interim Financial Reporting (IAS 34).

## 8. Definitions

### Replacement cost (RC)

According to this method of valuing inventories, the cost of goods sold is valued at the cost of replacement, i.e. at the average cost of raw materials of the month when sales materialise irrespective of inventories at the start or end of the period. The Replacement Cost Method is not accepted by the IFRS and is consequently not adopted for valuing inventories. This method does not reflect the cost of replacing other assets.

### Replacement cost adjusted (RCA)

In addition to using the replacement cost method, RCA items exclude non-recurrent events such as capital gains or losses on the disposal of assets, extraordinary taxes, impairment or reinstatement of fixed assets and environmental or restructuring charges which may affect the analysis of the Company's profit and do not reflect its operational performance.

Neither this report nor any part thereof, nor the fact of its distribution, shall form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever in any jurisdiction.

This report may include forward-looking statements. Forward-looking statements are statements other than in respect of historical facts. The words "believe", "expect", "anticipate", "intends", "estimate", "will", "may", "continue", "should" and similar expressions usually identify forward-looking statements. Forward-looking statements may include statements regarding: objectives, goals, strategies, outlook and growth prospects; future plans, events or performance and potential for future growth; liquidity, capital resources and capital expenditures; economic outlook and industry trends; energy demand and supply; developments of Galp's markets; the impact of regulatory initiatives; and the strength of Galp's competitors.

The forward-looking statements in this report are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although Galp believes that these assumptions were reasonable when made, these assumptions are inherently subject to significant known and unknown risks, uncertainties, contingencies and other important factors which are difficult or impossible to predict and are beyond its control. No assurance, however, can be given that such expectations will prove to have been correct. Important factors that may lead to significant differences between the actual results and the statements of expectations about future events or results include the Company's business strategy, industry developments, financial market conditions, uncertainty of the results of future projects and operations, plans, objectives, expectations and intentions, among others. Such risks, uncertainties, contingencies and other important factors could cause the actual results of Galp or the industry to differ materially from those results expressed or implied in this report by such forward-looking statements.

Real future income, both financial and operating; an increase in demand and change to the energy mix; an increase in production and changes to Galp's portfolio; the amount and various costs of capital, future distributions; increased resources and recoveries; project plans, timing, costs and capacities; efficiency gains; cost reductions; integration benefits; ranges and sale of products; production rates; and the impact of technology can differ substantially due to a number of factors. These factors may include changes in oil or gas prices or other market conditions affecting the oil, gas, and petrochemical industries; reservoir performance; timely completion of development projects; war and other political or security disturbances; changes in law or government regulation, including environmental regulations and political sanctions; the outcome of commercial negotiations; the actions of competitors and customers; unexpected technological developments; general economic conditions, including the occurrence and duration of economic recessions; unforeseen technical difficulties; and other factors.

The information, opinions and forward-looking statements contained in this report speak only as at the date of this report, and are subject to change without notice. Galp and its respective representatives, agents, employees or advisors do not intend to, and expressly disclaim any duty, undertaking or obligation to, make or disseminate any supplement, amendment, update or revision to any of the information, opinions or forward-looking statements contained in this report to reflect any change in events, conditions or circumstances.
