# Sustainable Development Goals

Our contribution

# What are SDG

The Sustainable Development Goals (SDGs) for 2030 were ratified by the 193 Member States in 25 September 2015.

The SDGs set the roadmap for sustainability management priorities for the following years.

In order to achieve these goals, it is essential the commitment and effort of each and every one of us: citizens, society, companies and governments.

## Our commitment to the SDG

At Galp, we assume the 17 SDGs as an integrated set of goals of crucial importance for a sustainable future. However, when in the sector where we operate and considering our activity, these goals assume different preponderances. That is why we have grouped them into three blocks that reflect their position in our activity:

### Material SDG, direct SDG and indirect SDG.

In order to identify the SDGs in which Galp has the greatest contribution and impact resulting from its activity, **we consulted our stakeholders and analysed the main global trends of the Oil&Gas sector**, using our **Materiality Matrix** as a reference.

## 7 AFFORDABLE AND CLEAN ENERGY

### Main targets:

7.1: By 2030, ensure universal access to affordable, reliable and modern energy services

7.2: By 2030, increase substantially the share of renewable energy in the global energy mix

7.3: By 2030, double the global rate of improvement in energy efficiency

7.a: By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology

# Affordable and clean energy

At Galp, we are focused on developing new solutions and business opportunities supported by a portfolio of competitive and differentiated renewable energy sources .

**27,039 m<sup>3</sup>** of biodiesel produced

**1,288 MWh** of renewable energy produced (gross)

**53%** of marketed electricity from renewable sources

**€142 m** capital employed in renewable energy

## 8 DECENT WORK AND ECONOMIC GROWTH

### Main targets:

8.6: By 2020, substantially reduce the proportion of youth not in employment, education or training

8.8: Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment

# Decent work and economic growth

We contribute to the development of the countries where we are present, promoting the well-being of the populations.

99% of local hiring

10.4% of employees with less than 30 years

275 employees hired under 30 years

94% of employees covered by health safety insurance

## Main targets:

9.4: By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities

9.5: Enhance scientific research, upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including, by 2030, encouraging innovation and substantially increasing the number of research and development workers per 1 million people and public and private research and development spending

# Industry, Innovation and Infrastructure

We promote the innovation and technological development, as well as the creation of sustainable, resilient and accessible infrastructures for all.

**More than €180m** innovation and R&D investment planned until 2025

**€16.9 m** invested in innovation and R&D

Founding member of **Singularity University Portugal**

Partner of the **Heriot-Watt University**

## 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

### Main targets:

12.2: By 2030, achieve the sustainable management and efficient use of natural resources

12.4: By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment

12.5: By 2030, substantially reduce waste generation through prevention, reduction, recycling and reuse

12.6: Encourage companies, especially large and transnational companies, to adopt sustainable practices and to integrate sustainability information into their reporting cycle

12.a: Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production

# Responsible consumption and production

We guarantee access to sustainable energy, providing energy solutions to our customers and promoting the efficiency of their consumption.

**€2.1m** invested in ecoefficiency projects in refining in 2021

Acquisition of **100% renewable** electricity in our operations in Portugal in 2021

**15%** of reused water in refining

**60%** of waste recovered

# 13 CLIMATE ACTION

## Main targets:

13.1: Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries

13.2: Integrate climate change measures into national policies, strategies and planning

13.3: Improve education, awareness-raising, and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning

## Climate Action

We participate actively and transparently in global climate change response initiatives.

Reduction of **40% absolute emissions from operations** (scopes 1 & 2) by 2030

Reduction of **40% of the production carbon intensity** and **20% of all downstream sales carbon intensity**, by 2030

Achievement of **Net Zero Emissions** (scopes 1, 2 e 3) by 2050

**1350 ktCO<sub>2</sub>e** of avoided emissions through renewable energy and energy solutions

**17** PARTNERSHIPS  
FOR THE GOALS

## Main targets:

17.6: Enhance North-South, South-South and triangular regional and international cooperation on and access to science, technology and innovation and enhance knowledge sharing on mutually agreed terms, including through improved coordination among existing mechanisms, in particular at the United Nations level, and through a global technology facilitation mechanism

17.7: Promote the development, transfer, dissemination and diffusion of environmentally sound technologies to developing countries on favorable terms, including on concessional and preferential terms, as mutually agreed

17.14: Enhance policy coherence for sustainable development

# Partnerships for the goals

We involve the community and other stakeholders, by promoting the creation of shared value.
